Activity Week 3
Leadership or Management?

Do you remember studying project management? Engineers frequently have to participate in both management and leadership. It is important to understand that there are *two very different, though related*, types of activities encompassed by these descriptions. If you don't get the correct balance between them, you will not be effective in either such role.

Today we will explore the sorts of activities undertaken by leaders & by managers and identify some of the key differences between them.

During Class

You will answer each of the questions overleaf, in turn.

You will work in discussion teams of 5 or 6 and compare your answers.

You will then discuss your answers with the whole class.

this week's out-of-class (i.e 'tutorial') question

In 60-100 words, explain the difference between the two key concepts, i.e. leadership & management, that we explored today.

THE FINE PRINT

This tutorial activity is designed to help students better understand the nature of leadership and team requirements.
