Participation Assessment Criteria

Here are the criteria used for assessing class participation.

1. **Preparation:** how well you know & understand the key ideas you are expected to use in this course, demonstrated by contribution to discussion (classroom or moodle).
2. **Contribution:** how valuably you contributed to the class discussions, with insightful answers, relevant questions, explanations of your own ideas, and comments on the contributions of others.
3. **Team discussion skills:** the extent to which you helped others also contribute by avoiding class domination, providing helpful answers & feedback, and showing tolerance & respect for others.
4. **Communication skills:** the quality of your expression, clarity, conciseness, use of appropriate words & gestures, and organisation of your ideas.
5. **Professional behaviours:** punctuality, reliability, etc.

Your Tutor will think about **all** these aspects when deciding your mark.
